SOPHOS
Security made simple.

MORE CLOUD.
LESS SERVER.

3 simple questions if you're thinking of
switching to Sophos Central

What is Sophos Central?

Sophos Central is the unified, cloud-based, console that enables you to manage Sophos endpoint protection, and all your other Sophos products, from a single place.

Is Sophos Central right for me?

Sophos Central is hosted by Sophos, so you'll no longer need to run or deploy servers to manage your security. You'll get the same next-generation endpoint protection you use today – all managed from the Cloud.

How do I make the switch to Sophos Central?

Imagine a worry-free path to the cloud. The Sophos Central microsite provides you with all the information you need to make an informed decision to switch. **Now that's security made simple.**

switch

Sophos Central
Extending protection beyond the endpoint.
